

Answer the clues below to complete the grid. The letters in the dark boxes going down spell out another word. When you have answered all the clues you will be able to discover this word.

lettuce

slug

bird

cat

Across:

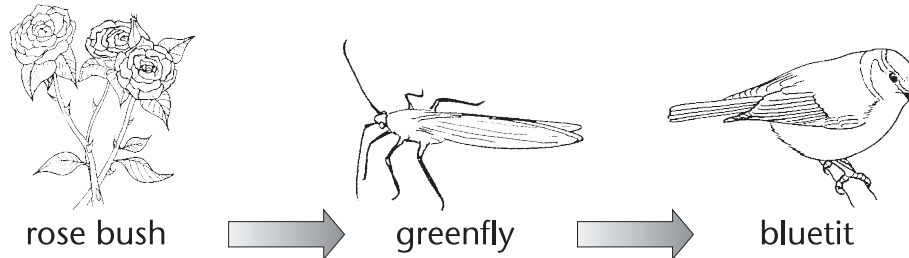

- 1 What does this picture show? A food
- 2 The bird is the prey. The cat is the
- 3 What feeds on the slug? The
- 4 Plants need water and to survive and to make food.
- 5 What does a food chain start with? A *p*
- 6 What is the last consumer in the food chain above? The
- 7 What is the producer in the food chain above? The

Word going down:

The place where a plant/animal lives is called its

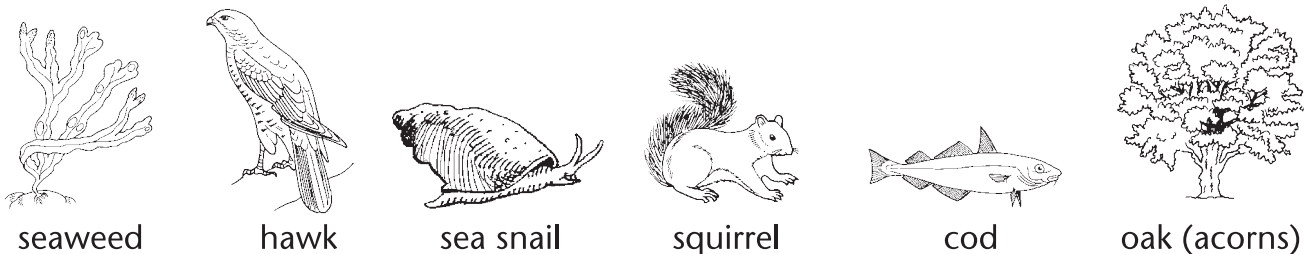

Environment and feeding relationships

1 A food chain, like one below, shows what eats what.

The picture shows that a bluetit feeds on greenfly, which feed on the rose bush.

Look at the living things below. Think about what each animal might eat. Cut out the pictures, stick them in your book or on paper and add some arrows to make food chains.

2 Look at the descriptions below. Match each one with the correct word..

Eats prey

prey

A plant that makes its own food

habitat

Eaten by a predator

producer

The place where an animal lives

predator

3 Habitats provide food and shelter for an animal.

Match up the animal to its habitat.

frog

squirrel

camel

rabbit
